PROFESSIONAL SUMMARY

QA/QC Engineer and NDT Level II inspector (Visual Testing and Radiographic Testing, certified per ASNT SNT-TC-1A) with 5+ years of hands-on experience in upstream oil and gas operations across Iraqi national operators (South Oil Company, Thi Qar Oil Company) and an international EPC environment (PetroChina Halfaya). Deep field expertise in pipeline and weld inspection, OCTG material inspection, radiographic film interpretation, pipe coating supervision and HSE compliance. Founder of VetriX IQ, a live cloud-based SaaS platform digitizing inspection, weld and corrosion data workflows for the oil and gas sector. Recognized with multiple industry awards for zero-incident project delivery and safety leadership.

CORE COMPETENCIES

- Visual Testing (VT Level II)
- Radiographic Testing (RT Level II)
- Pipeline and Weld Inspection
- OCTG Material Inspection
- Radiographic Film Interpretation
- Pipe Coating Supervision
- Permit to Work (PTW) Documentation
- HSE Risk Assessment
- SaaS Platform Development (Next.js, Supabase)

PROFESSIONAL EXPERIENCE

QA/QC Engineer | PetroChina Halfaya FZ-LLC, Missan, Iraq | 2022 - 2024

- Executed comprehensive inspection of tangible materials and OCTG (Oil Country Tubular Goods) to verify compliance with applicable international quality standards.
- Prepared, administered and tracked Permit to Work (PTW) documentation, ensuring full HSE regulatory compliance across all field operations.
- Facilitated pre-job safety meetings and authored detailed inspection reports, operational records and QA documentation packages.
- Earned Best Stop Card Contribution recognition for two consecutive years (2022 and 2023), demonstrating sustained safety leadership and proactive hazard identification.

Daily Maintenance Supervisor (QA/QC and NDT) | Thi Qar Oil Company (TOC), Thi Qar, Iraq | 2019 - 2021

- Performed Visual Testing (VT Level II) on welds across multi-diameter pipelines, identifying defects and ensuring weld quality standards were fully met.
- Interpreted radiographic films in strict accordance with approved international NDT specifications, applying RT Level II competencies.
- Inspected and verified piping deployed in production increase operations, confirming conformance to approved engineering and international specifications.
- Supervised pipe laying, welding and coating operations across various pipe diameters, maintaining workmanship and corrosion protection standards.
- Prepared PTW reports, led pre-work safety briefings and maintained comprehensive inspection and quality documentation packages.

QA/QC Inspector | South Oil Company (SOC) / Basra Oil Company, Basra, Iraq | 2015 - 2018

- Performed weld and fabrication inspection on upstream oil and gas facilities.
- Supported NDT activities and quality control documentation, in parallel with completing a B.Sc. in Computer Engineering.

TECHNOLOGY VENTURE

Founder and Lead Developer | VetriX IQ - Industrial Integrity Platform | 2024 - Present

Live cloud-based SaaS ecosystem digitizing safety inspection workflows in the oil and gas sector, built on Next.js and Supabase and deployed on Vercel. Private demo available on request.

- Architected and deployed a multi-module inspection platform: VetriX IQ Core (integrity platform), Weld IQ (weld quality report digitization) and Corrosion IQ (corrosion monitoring and trend tracking).
- Built a Qualification Management module enabling structured tracking and verification of personnel qualifications and NDT certifications across field teams.
- Implemented secure cloud authentication, an interactive admin dashboard for real-time data review and automated report generation, replacing manual paperwork with structured digital outputs.
- Applied 5+ years of NDT and QA/QC field expertise to define inspection logic, data models and workflow requirements reflecting real operational needs in upstream environments.

CERTIFICATIONS AND TRAINING

- NDT Level II - Visual Testing (VT), per ASNT SNT-TC-1A (employer certification)
- NDT Level II - Radiographic Testing (RT), per ASNT SNT-TC-1A (employer certification)
- HSE Risk Matrix Assessment
- Contractor and Contract Management - Thi Qar Oil Company (TOC)
- Overview of Contract Management in the Petroleum Industry - Petronas
- Office Administration Skills - Mselect

EDUCATION

Bachelor of Science, Computer Engineering | University of Technology, Baghdad | 2018

AWARDS AND RECOGNITION

- Best Stop Card Contribution Award - PetroChina Halfaya, 2022 and 2023.
- Focused Appreciation Award - delivered all Nasiriyah project programs without any HSE incident.
- Letter of Appreciation - Thi Qar Oil Company, for excellence in performance and on-time delivery of programs.
- Man of the Month - Nasiriyah Project, for exemplary implementation of HSE policies to the highest standards.
